

# SENSORY FUN PLAYTIME IDEAS:

## Prehistoric Dino Tray!

- Fill a container with colourful orange or red Gelli for a lava themed adventure.
- Alternatively, use green Gelli for a swampy Dino land!
- Stick images of bushes, mountains and volcanoes around the tray.
- Add a selection of dinosaur toys.

A great way to create a captivating sensory experience, to liven up playtime!

## Mess Free Feely Bags!

- Make up some Gelli in any bowl or container.
  - Open up a large zip lock bag, and fill approximately half full. (You may want to use a jug for this. And make sure not to over fill to avoid bursting!)
  - Seal it back up, and flatten out the bag to spread the Gelli.
- A fantastic way to bring sensory play to younger children, without any of the mess!

## Gelli Jungle Read & Learn!

- Create a bowl or tub of colourful, green Gelli.
- Place in front of a jungle themed picture book.
- Add a selection of jungle animal figures.

A unique way to discover and explore animals whilst reading and learning. Perfect for sensory play!

RLEAFUK235.1

**Warning:** GELLI IS SLIPPERY. Not suitable for children under 3 years old due to small part choking hazard. Adult supervision required at all times. Take care when entering and exiting the bath. Do not stand up until all Gelli residue is rinsed off the bath tub and your body. If Gelli gets on the floor/surfaces wipe it up immediately. If product gets into eyes, wash with water for 10 minutes. If symptoms persist seek medical advice. Non-irritant formula. For sensitive skin, test a small amount on skin first. Non-edible product. DO NOT EAT. If product is swallowed, drink plenty of fresh water. Product is non-toxic. Do not pour Gelli Baff powder into a bath without water. To avoid possible staining, do not let skin come in contact with powder prior to adding water/Gelli forming. Whilst making your Gelli, we recommend stirring with a large spoon or spatula. Do not empty onto grass. Keep packaging for future reference.

TOY**  
**BIODEGRADABLE  
GELLI!**

# PLEASE READ INSTRUCTIONS CAREFULLY BEFORE USE!

## Measure your water!

### In a bowl:

- For fluffy Gelli we recommend starting with around 1 Litre per 25g of powder.
- For squishy Gelli, start with 2 Litres of water per 25g of powder.

**THE MORE WATER YOU ADD,  
THE THINNER THE GELLI WILL BE!**

### In a bath tub:

- Start with around **4cm** of water (20 Litres) in a standard size bath tub.
- After you've added your **STEP 1** powder and the Gelli has formed, you can then add more water to thin it out.
- Water should not exceed 8cm!**  
(40 Litres)

## FOR USE IN A BATH TUB

### STEP 1: MAKE YOUR GELLI

1. Run your warm water tap as you would usually, but following the **Measure your water** instructions.  
**Please note:** Water should not exceed 8cm (40 Litres)
2. Gently sprinkle **150g** of **STEP 1** Gelli powder **slowly and evenly** over the surface of the water, and stir with your hands. The longer you mix it, the thicker it will get.
3. Gelli will not reach it's maximum thickness for 10-15 minutes. Once the Gelli is fully formed, you can then add more water to thin it out. Take care when getting in the bath, as Gelli is very slippery.

### STEP 2: DISPOSE OF YOUR GELLI

**Please note:** This should be done by an adult.

1. When you're finished, evenly sprinkle **STEP 2** powder over the Gelli Baff, and stir thoroughly with your hand, to help dissolve it into a drainable liquid. If you're using Gelli Baff Colour Change, watch as the Gelli magically changes colour!
2. The water will remain coloured, but the Gelli will be thinner and can easily be drained away. Don't worry if you think your Gelli Baff hasn't dissolved enough and you've run out of STEP 2 powder. Simply add some salt, and more water to dissolve what's left. Then simply pull the plug!

Gelli Baff is certified bio-degradable and when diluted, will not block drains. However if you have existing issues with (slow) drainage, we recommend disposing of the Gelli down the toilet.

3. Stay sat down, and rinse away any excess Gelli. Take care when getting out of the bath, as Gelli is very slippery.

## FOR USE IN A BOWL

### STEP 1: MAKE YOUR GELLI

1. Start by filling a bowl or container with warm water, following the **Measure your water** instructions. **DO NOT USE BOILING WATER.**
2. Measure out **25g** of **STEP 1** Gelli powder, and **slowly and evenly** sprinkle over the surface of the water, and stir occasionally with a large spoon or spatula. To avoid possible staining, do not let skin come in contact with powder prior to adding water or Gelli forming. The longer you mix it, the thicker it will get.
3. Once the Gelli is fully formed, you can then add more water to thin it out.  
**Do not exceed 5 Litres per 25g of powder!**

**Why not try adding some dinosaur figures to create a prehistoric sensory tub?**

**Please note:** Once a bag has been opened, we recommend storing in a dry, airtight container until next use.

### STEP 2: DISPOSE OF YOUR GELLI

**Please note:** This should be done by an adult.

1. When you're finished, you can evenly sprinkle some of the **STEP 2** powder over the Gelli, to help dissolve it into a drainable liquid. If you're using Gelli Baff Colour Change, watch as the Gelli magically changes colour!
2. The water will remain coloured, but the Gelli will be thinner and can easily be drained away. Carefully pour your Gelli down the toilet and flush.  
Gelli Baff is certified bio-degradable and when diluted, will not block toilets.
3. Rinse your container in the sink, to remove any excess Gelli.

## FOR TABLE-TOP MODELLING

### STEP 1: MAKE YOUR GELLI

1. Start by filling a bowl with 2 Litres of warm water.  
**DO NOT USE BOILING WATER.**
2. Measure out **25g** of **STEP 1** Gelli powder, **slowly and evenly** sprinkle over the surface of the water, and stir occasionally with a large spoon or spatula. To avoid possible staining, do not let skin come in contact with powder prior to adding water or Gelli forming.
3. Leave the Gelli for 30 minutes, until it reaches a mouldable consistency.
4. Time to get creative! - Use the Gelli to mould shapes, characters or even Gelli castles!

**Why not use cookie cutters to easily cut out and mould fun shapes?**

**Please note:** Once a bag has been opened, we recommend storing in a dry, airtight container until next use.

### STEP 2: DISPOSE OF YOUR GELLI

**Please note:** This should be done by an adult.

1. When you're finished, gather all the Gelli together and evenly sprinkle some of the **STEP 2** powder over the Gelli to help dissolve it into a drainable liquid. This should be done in a bowl or bucket.
2. The water will remain coloured, but the Gelli will be thinner and can easily be drained away. Carefully pour your Gelli down the toilet and flush.  
Gelli Baff is certified bio-degradable and when diluted, will not block toilets.
3. Rinse your container in the sink, to remove any excess Gelli.

**PRODUCT WILL BE SLIPPERY. TAKE CARE WHEN USING AT ALL TIMES**
